METAL TREATMENT
incorporating THE DROP FORGER

Index to volume 32

January to December 1965

ARTICLES

A

Ageing of corrosion-resistant Cr18Ni9Ti steels .. 335
Aluminium strain behaviour investigated 345
Application of lasers in production engineering .. 292
A.G.C. on pre-stressed strip mill 234
Atomic energy materials 284
Automatic control of a water-accumulator-driven forging press 82

B

Braking advances in industry 18

C

Cast dies and inserts for drop-forge work 144
Characteristics of drop forging plant 418
Combination die and tool design for quantity production 3
Cracking of 19/9 stainless tubing during heat treatment 19
Creep-rupture tests, effect of interruptions on .. 346
Creep-testing machine, a multiple 444
Critical resolved shear stress in some hexagonal close-packed alloys 303
Czechoslovak forging presses 74

D

Degree of damage at the French curve and at the fatigue limit during oscillating bend loading .. 55
Design of cold-working hammers 330
Design of press tools for drop forging mass production 480
Development of maraging stainless steels containing cobalt 49
Development of press tools for mass production in drop forging 473
Developments leading to pure ductile chromium .. 99
Direct-fired furnaces for scale-free heating 131
Drop forging plant, characteristics of 418
Drop Forging Research Association 435
Drop forging, theory and basic principles of 184, 210, 264
Drop forgings, exporting 204

E

Effect of brazing cycle on tensile properties of copper conductor alloys 122
Effect of forging deformation on elimination of carbide inhomogeneity in high-speed steels .. 168
Effect of interruptions on creep-rupture tests .. 346
Electrical and corrosion properties of nickel alloys—Effect of Cr, Mo, W, and Fe on alloys in the active state 307
Evaluation of hot-work die steels by impact and deflection 162
Exporting drop forgings 204
Extrusion at High Duty Alloys Ltd. 395

F

Fabricating a high-pressure storage vessel 76
Fatigue of aluminium 182

Forging crankshafts at Opel works, West Germany 130
Forging manipulators and presses, integration of .. 64
Forging plant productivity calculated by the regression analysis method 261
Forging press, automatic control of a water-accumulator-driven 82
Forging presses, Czechoslovak 74
Forging tong-holds by the stud welding process .. 70
Forgings and castings, respective merits of 40
Forward extrusion of aluminium using high strain rates 245

G

Gas-fired furnace development 154
German steel nomenclature 365

H

Hammer capacity and characteristic data for a high-speed die-forging press, measurement of .. 427
Hammers, design of cold-working 330
Hardening, stresses and deformations related to steel 322, 384
Heat treatment, cracking of 19/9 stainless tubing during 19
High-energy-rate forging 178
High-rate forging at Armstrong, Stevens & Son Ltd. 470
High-strength stainless steels 334

I

Improved ductility of molybdenum 291
Improving the quality of surface-hardened tractor crankshafts 374
Induction heating, recent developments in 93
Influence of niobium in steel 177
Integrated extrusion press installation 482
Integration of forging manipulators and presses .. 64
International drop forging convention .. 406, 431

L

Large induction melting furnace 280
Lasers in production engineering, application of .. 292

M

Magnesium extrusions and forgings 389
Manipulators in the forge 231
Maraging stainless steels containing cobalt, development of 473
Measurement of hammer capacity and characteristic data for a high-speed die-forging press .. 427
Metal forming: Current research in U.K. 112
Method of determining the quality of forgings from the degree of forging deformation 102
Morphology of precipitates in alpha-iron 139
Multiple creep-testing machine 444

N

National Metallurgical Laboratory, Jamshedpur .. 196
Nickle maraging steel for extrusion rams 344
Niobium in steel, influence of 177
Nitrided titanium alloy 54

O

Oxidation of steel in air and oil atmospheres .. 467

P

Pit furnace for rapid scale-free reheating of steel .. 381
Precision forging machines, the use of 296
Precision forging of steel tubes 109
Preparation of powder materials for electron microscopy 271
Press tools for drop forging mass production, the design of 480
Press tools for mass production in drop forging, development of 473
Processing steel slugs for cold extrusions 446
Profile milling, testing the accuracy of 372
Project SPEAR—electric steelmaking at Steel, Peech & Tozer 275

Q

Quality considerations in the manufacture of wrought copper and copper alloy products .. 250
Quality control of steel forgings 221

R

Recent developments in induction heating 93
Resistance heater increases forging efficiency .. 392
Respective merits of forgings and castings 40

S

Safety recommendations for compressed-air systems in the drop forging industry 14
Scale-free heating, direct-fired furnaces for .. 131
Scaling of steel in air and in oil atmospheres .. 450
Sheerwater companies of Efco Ltd. 30
Steel pressure hulls of new deep-diving research submarines 257

Steel research BISRA Battersea Laboratories .. 352
Strain behaviour investigated, aluminium .. 345
Stresses and deformations related to steel hardening 322, 384
Study of isothermal tempering of martensite in the Fe-Mo-C system 21

T

Testing the accuracy of profile milling 372
Theory and basic principles of drop forging 184, 210, 264
Titanium—its changing status 348

U

Use of precision forging machines 296

V

Vacuum degassing at Samuel Fox 27
Vacuum degassing of steel 258
Vertical scanner induction hardens truck and automotive axles 398

BOOKS

Aluminium extrusion brochure 108
Authoritative guide to fire extinguishers 388
Brochure for shipbuilding and engineering light alloy 198
'Cassel' manual of heat-treatment and case-hardening (7th edition, revised January 1964) 198
La dilatometrie differentielle appliquée et l'etude des aciers 198
Late-night garage list 388
Materials background to space technology 481
National Engineering Laboratory annual report 1964 443
Notched bar tests 233
Precautions in handling chemical cleaning solutions 443
Principles of heat treatment 108

LEADERS

Atomic energy research 283
British standards 161
Cogging by forge 39
Cross-spiral rolling 121
Drop forging research 363
Forge furnaces 321
Industrial exhibitions 201
Industrial training 81
Metallurgical research 243
München 405
Put to the test 1
Science and engineering 449

NADFS

Annual banquet 434
Annual convention, 1965 202
Internation drop forging convention—Munich 406, 418, 431, 450, 467, 473
Technical convention, 1964 2

NEW PLANT

Agiepuls process 36
Analytical instrument for research 488
Annealing technique 362
Average grain size counter 36
Cold headers 200
Czechoslovakian presses 486
Die spray unit for drop forging machines, new automatic 486
Electrode material for spark machining 38
Equipment from Eastern Germany, recent .. 242
Fluorescent metal-testing powder 486
'Foliac' wire-drawing lubricants 448
Forging machine for tool steels 488
Furnace atmosphere generators 32
Furnace-handling equipment 362
Hedin 1,400°C furnace 320
Kerosene burner from Schieldrop 318
Liquid nitriding plant 200
Lubrication unit for drop forging, extrusion, etc., automatic 320
Machines for Britain, a new range of 63
Maksiccar 3 Cement 29
Metaserv chemical saw 80
Open front trimming presses 448
Phoenix CM-70 32
Portable multirange hygrometer 320
Potentiometric programme temperature controllers 240
Robotug for GKN has automatic unloading facility 36
Safety with gas cylinders, improved 448
Satmumetal — a new magnetic material 488
Sealed-quench furnace 318
Shaker-hearth furnaces, improved design of .. 320
Shaw 'Thermodew' 242
Shell Irus Fluid 902 362
Speedomax chart recorder 38
Standardizing hardness tester 318
Tungsten carbide coatings are self-bonding .. 38
Unisteel 60 bars now easily weldable 72
Vertical furnace, 4,000°F 80
